CAREER OBJECTIVE

Computer Science and Engineering undergraduate with hands-on experience in Java, C++,web development, MERN stack technologies,SQL, and MongoDB. Passionate about software development, scalable systems, and problem solving, with a strong interest in building impactful applications and continuously expanding technical expertise

EDUCATION

Karpagam Academy of Higher Education **2023 - 2027**
Bachelor Of Engineering in Computer Science & Engineering 7.8/10 CGPA

INTERNSHIP

Yardstick Digital Solutions **July 2024**
MERN Stack Intern

- Completed a one-month internship focused on MERN stack development, gaining hands-on experience with MongoDB, Express.js, React.js, and Node.js.
- Collaborated with team members to implement and debug application features while following industry-standard development practices.

iDigisoft Technologies **May 2025**
Web Development Intern

- Successfully completed a one-month internship in Web Development, gaining practical experience in designing and developing web applications.
- Applied responsive design principles and performed testing to ensure compatibility across different browsers and devices.

PROJECTS

Inventory Management System — React.js, Node.js, MongoDB, Python, Gemini AI

- Developed an AI-powered inventory management system that uses OCR and Gemini AI to extract bill details and transform unstructured invoice data into structured database records.
- Built a demand forecasting module in Python to analyze sales history, predict future stock requirements, and generate low-stock alerts.
- Designed a responsive React dashboard featuring analytics charts, JWT-based authentication, OTP verification, and real-time inventory monitoring.
- Implemented RESTful APIs and optimized database operations to ensure efficient and scalable inventory management.

URL Shortener — React.js, Node.js, Express.js, MySQL

- Developed a full-stack URL shortener that enables users to create compact, shareable links from long URLs through a responsive React interface.
- Implemented a Node.js and Express.js backend for URL generation, redirection, validation, and persistent storage using MySQL.
- Integrated analytics features to track shortened-link usage and provide insights such as click counts and user engagement, along with convenient copy and reuse functionality.
- Implemented secure input validation and error handling to ensure reliable URL processing and a robust user experience.

TECHNICAL SKILLS

Programming Languages:Java, C++,Python (Basics)
Web Development:HTML,CSS,Javascript,MERN Stack
Databases:MySQL, MongoDB
Developer Tools:VS Code, GitHub
Soft Skills:Teamwork,Adaptability

CERTIFICATIONS

- **Python Fundamentals** – Infosys Springboard (2023)
- **Web Development Basics** – IBM (2024)
- **Certified System Administrator (CSA) – ServiceNow** (2026)
- **Certified Application Developer (CAD) – ServiceNow** (2026)
